LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to explain how microprocessors support people in two different workplaces. They will also learn to identify data files and compare local, network and portable storage. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Ask pupils to explain a workplace benefit and a task where a person still needs judgement or care. Check pupils distinguish a file from its storage location and explain one reason for their storage choice. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	7 September 2026	By the end of this lesson, students will be able to explain how microprocessors support people in two different workplaces.	**H:** Show a shop checkout, a factory robot and a patient-monitor picture. **ID:** Explain how technology supports scanning goods, repeated factory tasks and monitoring information. People remain responsible for decisions and care. **WD:** Trace a scanned product to a recorded sale and stock information, then compare a robot repeating a programmed task. **YD:** Pupils match workplace devices to jobs and prepare three questions about how technology helps their teacher work. **C:** Ask pupils to explain a workplace benefit and a task where a person still needs judgement or care.	**Support:** Provide labelled device pictures, a file-and-folder diagram and a short step checklist. Use prepared practice files and allow a spoken explanation before writing. **Extension:** Ask pupils to compare two storage choices, explain a limitation and justify how their folder or version names prevent confusion.
2	10 September 2026	By the end of this lesson, students will be able to	**H:** Show a document, image, sound and video	**Support:** Provide labelled device pictures, a file-and-

		identify data files and compare local, network and portable storage.	icon and ask how a computer keeps each item. **ID:** Explain that files store data. Compare a computer's storage drive, an authorised school network location and a teacher-managed flash drive. **WD:** Save a sample file in the class folder, show its location and use a diagram to compare access from another school computer. **YD:** Pupils sort file-type and storage-location cards, then choose storage for a task and give a reason. Use a simulation if network or portable storage is unavailable. **C:** Check pupils distinguish a file from its storage location and explain one reason for their storage choice.	folder diagram and a short step checklist. Use prepared practice files and allow a spoken explanation before writing. **Extension:** Ask pupils to compare two storage choices, explain a limitation and justify how their folder or version names prevent confusion.

MATERIALS NEEDED FOR THE WEEK

- Oxford International Primary Computing Student Book 4 printed pages 10-13
- Teacher computer and display
- Classroom computers, the approved software and the class save folder
- Prepared home and work device pictures, file and folder diagrams, and disposable practice files
- Whiteboard and markers
- Student notebooks, pencils and prepared vocabulary prompts
- Prepared task checklist and teacher observation record

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
