LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to create a folder, save a file in it and make a back-up copy. They will also learn to use helpful filenames, save changes regularly and avoid accidental overwriting. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check the original and copy both exist, open correctly and remain in the pupil's own authorised work area. Ask pupils to reopen the expected version and explain why cancelling a warning can protect earlier work. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	14 September 2026	By the end of this lesson, students will be able to create a folder, save a file in it and make a back-up copy.	**H:** Ask how to find a file among several documents with similar names. **ID:** Explain how folders organise work and how a back-up is an additional copy. Model only with disposable class practice files. **WD:** Create a Computing folder, save a short file, copy it to a Back-ups folder and locate both copies using name, type and modified date. **YD:** Pupils create a folder in their own class area, save a practice file and copy it to the agreed back-up location. Open each copy to check it. **C:** Check the original and copy both exist, open correctly and remain in the pupil's own authorised work area.	**Support:** Provide labelled device pictures, a file-and-folder diagram and a short step checklist. Use prepared practice files and allow a spoken explanation before writing. **Extension:** Ask pupils to compare two storage choices, explain a limitation and justify how their folder or version names prevent confusion.
2	17 September 2026	By the end of this lesson, students will be able to use helpful filenames,	**H:** Compare names such as Document1 and Animal_Facts_Draft and	**Support:** Provide labelled device pictures, a file-and-folder diagram and a short

		save changes regularly and avoid accidental overwriting.	ask which is easier to recognise. **ID:** Explain helpful names, folders, regular saving and making copies. An overwrite warning must be checked; cancel and ask if unsure. **WD:** Make a small edit and save it, then use Save As or the available equivalent to create a second version. Demonstrate cancelling an overwrite warning with disposable files. **YD:** Pupils improve names of practice files, save a change, create a second version and explain what to do at an unfamiliar overwrite warning. **C:** Ask pupils to reopen the expected version and explain why cancelling a warning can protect earlier work.	step checklist. Use prepared practice files and allow a spoken explanation before writing. **Extension:** Ask pupils to compare two storage choices, explain a limitation and justify how their folder or version names prevent confusion.

MATERIALS NEEDED FOR THE WEEK

- Oxford International Primary Computing Student Book 4 printed pages 14-17
- Teacher computer and display
- Classroom computers, the approved software and the class save folder
- Prepared home and work device pictures, file and folder diagrams, and disposable practice files
- Whiteboard and markers
- Student notebooks, pencils and prepared vocabulary prompts
- Prepared task checklist and teacher observation record

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
