LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to distinguish a web page, website, link and web browser. They will also learn to choose useful keywords and carry out a supervised web search. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check pupils explain the difference between a website and browser and identify what a link does. Check pupils select relevant words, recognise a search engine's purpose and explain which result may help answer the question. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	26 October 2026	By the end of this lesson, students will be able to distinguish a web page, website, link and web browser.	**H:** Ask pupils where information appears when they use the internet for school work. **ID:** Introduce Unit 2 Using the world wide web. Explain that the web is a service using the internet; pages may combine text, images, sound and video. **WD:** Use a teacher-approved site to identify one page, the related website, a link and the browser application. Compare the browser with the website displayed inside it. **YD:** Pairs label a screenshot and follow teacher-selected links between pages or use a prepared offline site map. **C:** Check pupils explain the difference between a website and browser and identify what a link does.	**Support:** Provide approved page screenshots, a vocabulary bank and a short search and safety checklist. Use a paired demonstration and prepared offline pages where needed. **Extension:** Ask pupils to justify a refined search or source choice, explain a limitation and compare two suitable ways to find the same information.
2	29 October 2026	By the end of this lesson, students will be able to	**H:** Compare a broad search for jaguar with a	**Support:** Provide approved page screenshots, a

		choose useful keywords and carry out a supervised web search.	clearer search for jaguar animal habitat. **ID:** Explain a search engine as a tool for finding pages. Short relevant keywords and the most important topic words help focus a search. **WD:** Turn a safe research question into keywords, review teacher-screened results and open an approved page. Do not treat the first result as automatically correct. **YD:** Pupils choose keywords for a prepared animal question and compare two searches using supervised access or prepared results cards. **C:** Check pupils select relevant words, recognise a search engine's purpose and explain which result may help answer the question.	vocabulary bank and a short search and safety checklist. Use a paired demonstration and prepared offline pages where needed. **Extension:** Ask pupils to justify a refined search or source choice, explain a limitation and compare two suitable ways to find the same information.

MATERIALS NEEDED FOR THE WEEK

- Oxford International Primary Computing Student Book 4 printed pages 20-25
- Teacher computer and display
- Class computers with supervised browser access and the class save folder
- Approved web pages, search and bookmark examples, or offline page cards
- Whiteboard and markers
- Student notebooks, pencils and prepared vocabulary prompts
- Source-check checklist and fictional online safety scenarios

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
