Week:	11 (Term 1)	**Year:**	4
Link:		**Cover:**	

LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to refine a search using more specific words, quotation marks or an exclusion. They will also learn to navigate an approved website and save a useful page as a bookmark. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Ask pupils to explain a change to a query and whether the revised results better match the task. Check the bookmark returns to the intended page and pupils explain how a menu or link helped them find information. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	2 November 2026	By the end of this lesson, students will be able to refine a search using more specific words, quotation marks or an exclusion.	**H:** Show prepared results for a general topic and ask which results do not match the question. **ID:** Explain refining keywords, using quotation marks for an exact phrase and a minus sign to exclude a term. Search behaviour can vary, so inspect results. **WD:** Compare teacher-tested examples for a book title and a vegetarian pizza search excluding margherita. Show the book's asterisk example as an optional demonstration if supported. **YD:** Pairs refine two safe searches or prepared result sets and record how their chosen change helps. Use only teacher-approved pages. **C:** Ask pupils to explain a change to a query and whether the revised results better match the task.	**Support:** Provide approved page screenshots, a vocabulary bank and a short search and safety checklist. Use a paired demonstration and prepared offline pages where needed. **Extension:** Ask pupils to justify a refined search or source choice, explain a limitation and compare two suitable ways to find the same information.

2	5 November 2026	By the end of this lesson, students will be able to navigate an approved website and save a useful page as a bookmark.	**H:** Ask how to return to a useful page without repeating the whole search. **ID:** Explain menus, links and site search, then distinguish a bookmark from a downloaded copy of a page. **WD:** Find a teacher-selected animal fact using a menu and link, create a Computing bookmark folder and save the page with a clear name. **YD:** Pupils navigate approved pages, bookmark one useful page and reopen it from the bookmark folder. Use offline link and bookmark cards if needed. **C:** Check the bookmark returns to the intended page and pupils explain how a menu or link helped them find information.	**Support:** Provide approved page screenshots, a vocabulary bank and a short search and safety checklist. Use a paired demonstration and prepared offline pages where needed. **Extension:** Ask pupils to justify a refined search or source choice, explain a limitation and compare two suitable ways to find the same information.

MATERIALS NEEDED FOR THE WEEK

- Oxford International Primary Computing Student Book 4 printed pages 26-29
- Teacher computer and display
- Class computers with supervised browser access and the class save folder
- Approved web pages, search and bookmark examples, or offline page cards
- Whiteboard and markers
- Student notebooks, pencils and prepared vocabulary prompts
- Source-check checklist and fictional online safety scenarios

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
