## LESSON OVERVIEW

### What should students know/do by the end of this week's lessons?

Students will learn to explain and apply system software and utilities, using accurate textbook terminology and a justified example. They will also learn to explain and apply operating systems and office applications, using accurate textbook terminology and a justified example. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

### End-of-Week Assessment/Check: How will you know they got it?

Teacher questioning, class discussion, the completed textbook activities and the final checks in both lessons. Check accurate terminology, explanations and application through the relevant book activities and questions. Record misconceptions and use the next feedback or consolidation session for corrections. Assess only content already taught.

## LESSON SLOTS - MONDAY & WEDNESDAY

| Lesson | Date | Learning Objective | The Lesson Flow | Differentiation |
|---|---|---|---|---|
| 1 | 26 October 2026 | By the end of this lesson, students will be able to explain and apply system software and utilities, using accurate textbook terminology and a justified example. | **H:** Use a short scenario, image or retrieval question to introduce system software and utilities.<br>ID: Teach system software and utilities from printed pages 42-49; include the relevant definitions, diagrams and examples.<br>**WD:** Work through a textbook example or comparison for system software and utilities; explain each decision and check understanding.<br>YD: Complete the relevant textbook activities and questions for system software and utilities. Use a practical demonstration or scenario where appropriate; finish remaining practice as homework.<br>**C:** Explain one key idea | **Support:** Provide labelled diagrams, vocabulary, a structured response frame and a worked example. Apply agreed access arrangements during independent assessment without supplying answers.<br>Extension: Justify an alternative solution, explain a limitation or apply the same concept to a new scenario using evidence. |

## MATERIALS NEEDED FOR THE WEEK

- Pearson Edexcel International GCSE (9-1) ICT Student Book, printed pages 42-49
- Teacher computer and display
- School-approved applications, class save folder and fictional scenarios
- Relevant textbook diagrams, activities and chapter questions
- Student notebooks and a teacher assessment checklist

## END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
