LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to compare a tablet, smartphone and laptop and describe a useful mobile-device feature. They will also learn to describe how computers support two different jobs. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Ask for a device choice supported by a feature rather than just a preference. Ask pupils to explain what the computer does and what the worker does in one example. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	7 September 2026	By the end of this lesson, students will be able to compare a tablet, smartphone and laptop and describe a useful mobile-device feature.	**H:** Show pictures of someone using a device on a bus and at a desk. **ID:** Explain mobile and hand-held devices, touchscreens and on-screen keyboards. Portability is a feature, not proof that a device is best for every task. **WD:** Compare typing a short sentence on a laptop and a touchscreen example, using a teacher demonstration or prepared images. **YD:** Pupils match mobile devices to everyday tasks and explain how size, carrying and input methods affect the choice. **C:** Ask for a device choice supported by a feature rather than just a preference.	**Support:** Use labelled device pictures, a vocabulary bank and a paired demonstration. Accept a spoken explanation before a short written response. **Extension:** Ask pupils to compare two suitable devices or job tasks and explain a benefit and a limitation of their choice.
2	10 September 2026	By the end of this lesson, students will be able to describe how computers support two different jobs.	**H:** Show the book's doctor and shopkeeper examples and ask what information each person needs.	**Support:** Use labelled device pictures, a vocabulary bank and a paired demonstration. Accept a spoken explanation before a short written

			ID: Explain that computers can store, find and communicate information for different jobs; a person still chooses what to do. **WD:** Match a doctor to patient records and a shopkeeper to stock records using fictional information. **YD:** Pairs sort job-and-task cards, then draw a worker using a computer and label the task it supports. **C:** Ask pupils to explain what the computer does and what the worker does in one example.	response. **Extension:** Ask pupils to compare two suitable devices or job tasks and explain a benefit and a limitation of their choice.

MATERIALS NEEDED FOR THE WEEK

- Oxford International Primary Computing Student Book 3 printed pages 10-13
- Teacher computer and display
- Classroom computers, the approved software and the class save folder
- Prepared device pictures, job-and-task cards and labelled diagrams
- Whiteboard and markers
- Student notebooks, pencils and prepared vocabulary prompts
- Prepared task checklist and teacher observation record

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
