LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to identify a digital device and explain the roles of its main parts. They will also learn to choose a suitable device for a real-life task and justify the choice. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Record whether pupils can link a named part to its role rather than only copying a label. Check that each pupil gives a task-based reason and recognises one limitation. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	21 September 2026	By the end of this lesson, students will be able to identify a digital device and explain the roles of its main parts.	**H:** Display a mystery-device picture and ask which clues show that it is digital. **ID:** Explain the practical task: name the device, identify input and output, and describe what happens inside at a simple level. **WD:** Annotate an unrelated example, separating the device's physical parts from what each part does. **YD:** Pupils label a desktop, laptop or tablet diagram, then explain an input-process-output example to a partner. **C:** Record whether pupils can link a named part to its role rather than only copying a label.	**Support:** Use labelled device pictures, a vocabulary bank and a paired demonstration. Accept a spoken explanation before a short written response. **Extension:** Ask pupils to compare two suitable devices or job tasks and explain a benefit and a limitation of their choice.
2	24 September 2026	By the end of this lesson, students will be able to choose a suitable device for a real-life task and justify the choice.	**H:** Offer a tablet, laptop and desktop picture for making a long written report. **ID:** Review useful	**Support:** Use labelled device pictures, a vocabulary bank and a paired demonstration. Accept a spoken explanation before a short written response.

			features: keyboard, screen, portability and the task's needs; there can be more than one justified answer. **WD:** Model comparing two devices for one task and giving a reason connected to a feature. **YD:** Pairs choose devices for writing, travelling and viewing information, then discuss a task where human help is more suitable. **C:** Check that each pupil gives a task-based reason and recognises one limitation.	**Extension:** Ask pupils to compare two suitable devices or job tasks and explain a benefit and a limitation of their choice.

MATERIALS NEEDED FOR THE WEEK

- Oxford International Primary Computing Student Book 3 printed pages 6-17
- Teacher computer and display
- Classroom computers, the approved software and the class save folder
- Prepared device pictures, job-and-task cards and labelled diagrams
- Whiteboard and markers
- Student notebooks, pencils and prepared vocabulary prompts
- Prepared task checklist and teacher observation record

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
