LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to apply the Unit 1 ideas in a short knowledge and device-choice check. They will also learn to correct a misconception about digital devices and apply the correction to a new example. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Record secure outcomes and group common misunderstandings for the next lesson. Ask pupils to explain their change and check whether they can transfer it to a different example. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	28 September 2026	By the end of this lesson, students will be able to apply the Unit 1 ideas in a short knowledge and device-choice check.	**H:** Revisit the device, parts, jobs, benefits and choices vocabulary. **ID:** Explain the learning check and the expectation to show an individual understanding of familiar tasks. **WD:** Demonstrate how to label a diagram and give a reason using an example that is not in the check. **YD:** Pupils identify devices and parts, link a computer to a job, and justify a device choice in short practical or paper tasks. **C:** Record secure outcomes and group common misunderstandings for the next lesson.	**Support:** Use labelled device pictures, a vocabulary bank and a paired demonstration. Accept a spoken explanation before a short written response. **Extension:** Ask pupils to compare two suitable devices or job tasks and explain a benefit and a limitation of their choice.
2	1 October 2026	By the end of this lesson, students will be able to correct a misconception about digital devices and apply the correction to a new example.	**H:** Show an anonymous response confusing an input with an output. **ID:** Revisit the most common gaps from the	**Support:** Use labelled device pictures, a vocabulary bank and a paired demonstration. Accept a spoken explanation before a short written response.

			learning check and explain the relevant ideas with a fresh example. **WD:** Model improving one explanation, then test it on another device or job. **YD:** Pupils correct their own work and complete a similar task; provide targeted guided practice where needed. **C:** Ask pupils to explain their change and check whether they can transfer it to a different example.	**Extension:** Ask pupils to compare two suitable devices or job tasks and explain a benefit and a limitation of their choice.

MATERIALS NEEDED FOR THE WEEK

- Oxford International Primary Computing Student Book 3 printed pages 4-19
- Teacher computer and display
- Classroom computers, the approved software and the class save folder
- Prepared device pictures, job-and-task cards and labelled diagrams
- Whiteboard and markers
- Student notebooks, pencils and prepared vocabulary prompts
- Prepared task checklist and teacher observation record

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
