LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to compare ways of communicating and describe email as an electronic message. They will also learn to identify the sender, recipient, subject and main parts of an email. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Ask pupils to explain what an email is and justify a communication choice. Check sender and recipient are correctly distinguished and that the subject matches the message. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	26 October 2026	By the end of this lesson, students will be able to compare ways of communicating and describe email as an electronic message.	**H:** Ask how an explorer could send news from a distant place. **ID:** Introduce Unit 2 Explorers. Compare face-to-face talk, letters, calls and email by speed, purpose and whether the message is private or shared. **WD:** Compare sending a brief update by letter and email, discussing what is needed to send and receive each. **YD:** Pairs choose a communication method for prepared scenarios and explain one advantage or limitation. **C:** Ask pupils to explain what an email is and justify a communication choice.	**Support:** Provide a labelled email model, a short checklist and prepared non-personal files. Support reading and typing in the approved practice system or offline simulation. **Extension:** Ask pupils to improve the clarity of a message or explain why a realistic but unfamiliar message still needs adult checking.
2	29 October 2026	By the end of this lesson, students will be able to identify the sender, recipient, subject and main parts of an email.	**H:** Show a fictional explorer email and ask who wrote it and who will receive it. **ID:** Explain sender,	**Support:** Provide a labelled email model, a short checklist and prepared non-personal files. Support reading and typing in the approved practice system or offline simulation.

			recipient, subject, greeting, body, closing and signature using the book example. **WD:** Label the example and distinguish the address of the person sending the message from the address receiving it. **YD:** Pupils label a second prepared email and draft a clear subject and greeting for a classroom update. **C:** Check sender and recipient are correctly distinguished and that the subject matches the message.	**Extension:** Ask pupils to improve the clarity of a message or explain why a realistic but unfamiliar message still needs adult checking.

MATERIALS NEEDED FOR THE WEEK

- Oxford International Primary Computing Student Book 3 printed pages 20-25
- Teacher computer and display
- Class computers with school-managed email practice or an offline simulation; prepared non-personal files
- School-managed email practice system and approved classroom recipients, or offline email forms and file cards
- Whiteboard and markers
- Student notebooks, pencils and prepared vocabulary prompts
- Fictional email examples and teacher-prepared non-personal attachment files

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
