LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to attach a suitable file to a practice email and check it before sending. They will also learn to recognise an unexpected or suspicious email and demonstrate asking a trusted adult. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check the correct file is attached and that pupils do not open or forward unexpected attachments. Check pupils protect private information and ask an adult before acting on an unfamiliar message. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	9 November 2026	By the end of this lesson, students will be able to attach a suitable file to a practice email and check it before sending.	**H:** Ask how an explorer could share a picture without copying it into the message text. **ID:** Explain an attachment as a file sent with a message, such as a picture or document. Use only prepared non-personal files. **WD:** Compose a message, use the attachment control, select the correct class file and verify its name before sending to the approved recipient. **YD:** Pupils attach a teacher-provided picture or document to a practice message and describe the attachment in the body; use an offline simulation if needed. **C:** Check the correct file is attached and that pupils do not open or forward unexpected attachments.	**Support:** Provide a labelled email model, a short checklist and prepared non-personal files. Support reading and typing in the approved practice system or offline simulation. **Extension:** Ask pupils to improve the clarity of a message or explain why a realistic but unfamiliar message still needs adult checking.
2	12 November	By the end of this lesson,	**H:** Present a fictional prize	**Support:** Provide a labelled

MATERIALS NEEDED FOR THE WEEK

- Oxford International Primary Computing Student Book 3 printed pages 30-33
- Teacher computer and display
- Class computers with school-managed email practice or an offline simulation; prepared non-personal files
- School-managed email practice system and approved classroom recipients, or offline email forms and file cards
- Whiteboard and markers
- Student notebooks, pencils and prepared vocabulary prompts
- Fictional email examples and teacher-prepared non-personal attachment files

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
