LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to combine composing, replying and attaching a file in a supervised email task. They will also learn to apply email vocabulary, message-writing and safety rules in a short learning check. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Observe the sequence, clear writing, suitable attachment and safe response to a separate fictional suspicious-message card. Record practical independence and safety reasoning, then identify skills to revisit during review. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	16 November 2026	By the end of this lesson, students will be able to combine composing, replying and attaching a file in a supervised email task.	**H:** Revisit the explorer scenario and the checklist for a helpful message. **ID:** Explain the task: send a short update with a prepared image and reply to an expected class message without sharing personal information. **WD:** Model using the checklist on an unrelated example and checking the attachment filename before the final send step. **YD:** Pupils complete the task in school-managed accounts with approved recipients, or use paper email forms and file cards in the offline version. **C:** Observe the sequence, clear writing, suitable attachment and safe response to a separate fictional suspicious-message card.	**Support:** Provide a labelled email model, a short checklist and prepared non-personal files. Support reading and typing in the approved practice system or offline simulation. **Extension:** Ask pupils to improve the clarity of a message or explain why a realistic but unfamiliar message still needs adult checking.
2	19 November 2026	By the end of this lesson, students will be able to	**H:** Display the sender, recipient, subject, reply	**Support:** Provide a labelled email model, a short checklist

		apply email vocabulary, message-writing and safety rules in a short learning check.	and attachment prompts. **ID:** Explain that the check covers only the communication and email skills already practised. **WD:** Show how to record an answer using a different example, without rehearsing the assessed responses. **YD:** Pupils identify email parts, draft a useful subject, select an attachment and explain a safe response to an unexpected message. **C:** Record practical independence and safety reasoning, then identify skills to revisit during review.	and prepared non-personal files. Support reading and typing in the approved practice system or offline simulation. **Extension:** Ask pupils to improve the clarity of a message or explain why a realistic but unfamiliar message still needs adult checking.

MATERIALS NEEDED FOR THE WEEK

- Oxford International Primary Computing Student Book 3 printed pages 20-35
- Teacher computer and display
- Class computers with school-managed email practice or an offline simulation; prepared non-personal files
- School-managed email practice system and approved classroom recipients, or offline email forms and file cards
- Whiteboard and markers
- Student notebooks, pencils and prepared vocabulary prompts
- Fictional email examples and teacher-prepared non-personal attachment files

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
