Classroom routines and saving work

Our computer-room rules

Walk carefully and keep food and drinks away from equipment. Use clean, dry hands. Keep cables and plugs for adults to handle.

Listen during demonstrations. Use kind words and ask before touching another pupil's equipment or work. Stop and raise a hand when you need help.

Practise the routine

1. Sit safely and check that the equipment is ready. Tell the teacher about any damage.

2. Open the teacher-approved program. Create a small drawing or write a short greeting.

3. Choose Save or Save as. Use the class folder shown by the teacher and a short, useful filename. Do not use a home address or other private information.

4. Close and reopen the file. Explain where it was saved.

5. Leave the workspace tidy. Follow the teacher's sign-out or shutdown instructions.

Check your learning

Show two classroom rules. Demonstrate how to ask for help and reopen your saved file.

Book connection

Oxford International Primary Computing Student Book 2, Introduction, printed page 3. The following classroom activities are teacher-designed.

Introduction

Delivering computing to young learners

Oxford International Primary and Lower Secondary Computing is a complete syllabus for computing education for ages 5–14 (Years 1–9). By following the program of learning set out in this series, teachers can feel reassured that their students have access to the computing skills and understanding that they need for their future education.

Structure of the book

This book is divided into six chapters, for Year 2 (ages 6–7).

1. **The nature of technology:** Introduction to the different parts of a computer
2. **Digital literacy:** Finding information on the internet
3. **Computational thinking:** Planning how to solve a problem
4. **Programming:** Making a program with a simple loop
5. **Multimedia:** Making a document with a computer
6. **Numbers and data:** Using a spreadsheet to do sums

What you will find in each unit

- Introduction: An offline activity and a class discussion help students to start thinking about the topic.
- Lessons: Six lessons guide students through activity-based learning.
- Check what you know: A test and activities allow you to measure students' progress.

What you will find in the lessons

Although each lesson is unique, they have common features: learning outcomes for each lesson are set out at the start; learning content delivers skills and develops understanding.

Every lesson involves a learning activity for the students.

Activities to extend students who are able to do more.

Questions check students' understanding of the lesson.

Additional features

You will also find these features throughout the book:

The word cloud builds vocabulary by identifying key terms from the unit.

Suggestions for creative and artistic work.

Extra tasks that can be taken outside the classroom and into the home.

Advice on using computers responsibly in life.

Glossary Key terms are identified in the text and defined in the glossary at the end.

Assessing student achievement

The final pages in each unit give an opportunity to assess student achievement.

- Developing: This acknowledges the achievement of students who find the content challenging but have made progress.
- Secure: Students have reached the level set out in the programme for their age group. Most should reach this level.
- Extended: This recognises the achievement of students who have developed above-average skills and understanding.

Questions and activities are colour-coded according to achievement level. Self-evaluation advice helps students to check their own progress.

Software to use

We recommend Scratch for writing programs at this age. For other lessons, teachers can use any suitable software, for example: Microsoft Office; Google Drive software; LibreOffice; any web browser.

Source files

You will see this symbol on some of the pages.

This means that there are extra files you can access to help with the learning activities. For example, Scratch programming files and downloadable images.
