## LESSON OVERVIEW

### What should students know/do by the end of this week's lessons?

Students will demonstrate the knowledge and practical skills taught in Unit 1: robot uses, sensors, controllers, actuators and feedback loops. The two lessons provide independent school assessment tasks and opportunities to show a practical skill and explain a choice.

### End-of-Week Assessment/Check: How will you know they got it?

Assess the prepared knowledge and practical tasks against the taught outcomes. Record correct responses, independent actions, explanations and any access support provided. Use the results to identify specific skills for follow-up.

## LESSON SLOTS - WEDNESDAY AND THURSDAY

| Lesson | Date | Learning Objective | The Lesson Flow | Differentiation |
|---|---|---|---|---|
| 1 | 14 October 2026 | By the end of this lesson, students will be able to complete an independent school assessment of robot knowledge and control systems. | **H:** Welcome pupils calmly and check that the prepared papers or saved drafts are ready.<br><br>**ID:** Explain the familiar task format, success criteria and agreed access arrangements; pupils work independently.<br><br>**WD:** Demonstrate only how to record or save an answer using an unrelated example; do not rehearse assessed content.<br><br>**YD:** Pupils identify robot applications, label sensors and actuators and trace a feedback loop. Collect evidence and record any technical or access support.<br><br>**C:** Check that evidence is saved or collected, record independence against the criteria and identify outcomes for later feedback. | **Support:** Apply the school's agreed access arrangements. Read task instructions without giving content answers and record any assistance.<br><br>**Extension:** Use the planned explanation or design-justification question after the core tasks; do not introduce new content. |
| 2 | 15 October 2026 | By the end of this lesson, students will be able to demonstrate the taught | **H:** Welcome pupils calmly and check that the prepared papers or saved | **Support:** Apply the school's agreed access arrangements. Read task instructions without |

## MATERIALS NEEDED FOR THE WEEK

- Oxford International Primary Computing Student Book 6 printed pages 4-19
- Teacher computer and display
- Classroom computers or laptops and the class save folder
- Prepared school assessment tasks covering the stated outcomes
- Whiteboard and markers
- Student notebooks, pencils and task sheets
- Teacher observation checklist and school access arrangements

## END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
