LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to create and save a web page with a clear heading and relevant body text. They will also learn to add an appropriate permitted image and explain how it supports a web page. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check the title, readable body text, saved draft and absence of identifying information. Check image relevance, readable layout, permission or credit and a description of what the image communicates. Note pupils who need further guided practice.

LESSON SLOTS - WEDNESDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	4 November 2026	By the end of this lesson, students will be able to create and save a web page with a clear heading and relevant body text.	**H:** Revisit the wireframe and ask what belongs in the header and body. **ID:** Explain the teacher-approved web editor and local or private preview; use school-managed access and no public publishing. **WD:** Model a blank page, add a title and a short paragraph, then save and preview it; show the class folder or draft location. **YD:** Pupils build a robot information page from their plan, using their own words and no personal details, then save and preview it. **C:** Check the title, readable body text, saved draft and absence of identifying information.	**Support:** Provide a simple wireframe, a school-managed starter and an approved image pack. Model one edit at a time and support saving and previewing. **Extension:** Ask pupils to justify a layout choice or improve accessibility, then retest the saved site using the same checklist.
2	5 November 2026	By the end of this lesson, students will be able to add an appropriate permitted image and explain how it supports a	**H:** Show two images beside the same paragraph and ask which communicates the idea better.	**Support:** Provide a simple wireframe, a school-managed starter and an approved image pack. Model one edit at a time and support saving and

		web page.	**ID:** Review image permission, credit, privacy, proportion and descriptive alternative text where available. **WD:** Insert a teacher-provided image, resize it proportionally, position it beside related text and record its source or credit. **YD:** Pupils add a logo or topic image from the approved image pack and check their saved preview. **C:** Check image relevance, readable layout, permission or credit and a description of what the image communicates.	previewing. **Extension:** Ask pupils to justify a layout choice or improve accessibility, then retest the saved site using the same checklist.

MATERIALS NEEDED FOR THE WEEK

- Oxford International Primary Computing Student Book 6 printed pages 26-29
- Teacher computer and display
- Classroom computers or laptops and the class save folder
- Teacher-approved web editor, wireframe sheet and website review checklist
- Whiteboard and markers
- Approved image pack with permission details and source-credit records
- Prepared examples and the lesson success checklist

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
