LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to complete and test a small linked website for a stated audience. They will also learn to demonstrate respectful editing and explain the structure and improvement of a small website. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check the brief, page content, image permissions, saved work and recorded link-test results. Record secure outcomes and targets for mock assessment, including independent saving, navigation and respectful feedback. Note pupils who need further guided practice.

LESSON SLOTS - WEDNESDAY AND THURSDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	18 November 2026	By the end of this lesson, students will be able to complete and test a small linked website for a stated audience.	**H:** Ask what a visitor needs to learn from a robot information site. **ID:** Set the brief: Home and Gallery pages, relevant text and permitted images, a consistent menu and private preview. **WD:** Demonstrate checking the brief against a saved draft, choosing one missing feature and testing after the change. **YD:** Pupils complete their two-page site, save a final draft and ask a partner to test both navigation routes. **C:** Check the brief, page content, image permissions, saved work and recorded link-test results.	**Support:** Provide a simple wireframe, a school-managed starter and an approved image pack. Model one edit at a time and support saving and previewing. **Extension:** Ask pupils to justify a layout choice or improve accessibility, then retest the saved site using the same checklist.
2	19 November 2026	By the end of this lesson, students will be able to demonstrate respectful editing and explain the	**H:** Display the six web-page component labels for a retrieval task.	**Support:** Provide a simple wireframe, a school-managed starter and an approved image pack. Model one edit at a time

		structure and improvement of a small website.	**ID:** Explain the check: identify components, show saved pages, demonstrate navigation and explain a revision. **WD:** Model how to show evidence from a separate example without editing pupils' assessed drafts. **YD:** Pupils complete a short knowledge check, demonstrate their saved site and explain an image choice and one improvement. **C:** Record secure outcomes and targets for mock assessment, including independent saving, navigation and respectful feedback.	and support saving and previewing. **Extension:** Ask pupils to justify a layout choice or improve accessibility, then retest the saved site using the same checklist.

MATERIALS NEEDED FOR THE WEEK

- Oxford International Primary Computing Student Book 6 printed pages 20-35
- Teacher computer and display
- Classroom computers or laptops and the class save folder
- Teacher-approved web editor, wireframe sheet and website review checklist
- Whiteboard and markers
- Approved image pack with permission details and source-credit records
- Prepared examples and the lesson success checklist

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
