LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Lesson 1: Audience positioning and camera techniques. Lesson 2: Camera shots and intertextuality. Students will explain how camera techniques position an audience and analyse shots and recognise intertextual references. Knowledge and application follow the weekly reference extract, printed pages 22-25.

End-of-Week Assessment/Check: Review the independent responses and both exit checks for accurate terminology, specific evidence and clear explanations. Record misconceptions for the next lesson.

LESSON SLOTS - TUESDAY AND FRIDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	15 September 2026	Lesson 1: Audience positioning and camera techniques By the end of this lesson, students will be able to explain how camera techniques position an audience.	H (5 min): Use a short example or retrieval question to activate prior knowledge of audience positioning and camera techniques. ID (10 min): Teach audience involvement, point of view, shot reverse shot and insert shots; how selected information directs attention. WD (10 min): Model one analysis or worked response. Identify a specific feature, explain its meaning and link it to audience or purpose. YD (15 min): Students annotate a short sequence to show what the viewer sees, knows and feels; justify two camera choices. Require evidence and explanations, then check responses with a partner. C (5 min): Students explain how one shot places the viewer in relation to a character. Use responses to identify misconceptions.	Support: Provide key vocabulary, a labelled example and a response frame. Break the task into steps and check understanding before independent work. Extension: Compare an alternative example or interpretation and justify how context changes the audience response.

2	18 Septemb er 2026	Lesson 2: Camera shots and intertextuality By the end of this lesson, students will be able to analyse shots and recognise intertextual references.	H (5 min): Use a short example or retrieval question to activate prior knowledge of camera shots and intertextuality. ID (10 min): Teach framing, shot distance and camera angle; intertextuality as a recognisable link to another text. WD (10 min): Model one analysis or worked response. Identify a specific feature, explain its meaning and link it to audience or purpose. YD (15 min): Students identify shots in a sequence and analyse a teacher-provided intertextual reference; explain the effect on an informed viewer. Require evidence and explanations, then check responses with a partner. C (5 min): Students distinguish a camera technique from an intertextual reference. Use responses to identify misconceptions.	Support: Provide key vocabulary, a labelled example and a response frame. Break the task into steps and check understanding before independent work. Extension: Compare an alternative example or interpretation and justify how context changes the audience response.

MATERIALS NEEDED FOR THE WEEK

- GCSE Media Studies for AQA (Heinemann, 2004), printed pages 22-25; matching weekly reference PDF.
- Teacher computer, display screen and speakers where audio is used
- Age-appropriate teacher-selected extracts or teacher-prepared fictional media texts
- Prepared analysis worksheet, evidence grid or production brief
- Paper, pencils, storyboard or design templates, and whiteboard markers
- Classroom computers and save folders; camera or approved image bank when required
- Lesson success criteria and teacher observation checklist

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
