LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Lesson 1: Television history and production. Lesson 2: Title sequences: images and technical codes. Students will explain television developments and production decisions and analyse images and technical codes in title sequences. Knowledge and application follow the weekly reference extract, printed pages 34-39.

End-of-Week Assessment/Check: Review the independent responses and both exit checks for accurate terminology, specific evidence and clear explanations. Record misconceptions for the next lesson.

LESSON SLOTS - TUESDAY AND FRIDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	27 October 2026	Lesson 1: Television history and production By the end of this lesson, students will be able to explain television developments and production decisions.	H (5 min): Use a short example or retrieval question to activate prior knowledge of television history and production. ID (10 min): Teach the textbook's historical UK timeline; public-service and commercial broadcasting, funding, peak time and production components. WD (10 min): Model one analysis or worked response. Identify a specific feature, explain its meaning and link it to audience or purpose. YD (15 min): Students sequence key developments and compare funding models; outline the people and decisions needed to produce a programme. Require evidence and explanations, then check responses with a partner. C (5 min): Students explain how funding or scheduling can influence programme choices. Use responses to identify misconceptions.	Support: Provide key vocabulary, a labelled example and a response frame. Break the task into steps and check understanding before independent work. Extension: Compare an alternative example or interpretation and justify how context changes the audience response.

2	30 October 2026	Lesson 2: Title sequences: images and technical codes By the end of this lesson, students will be able to analyse images and technical codes in title sequences.	H (5 min): Use a short example or retrieval question to activate prior knowledge of title sequences: images and technical codes. ID (10 min): Teach title-sequence purposes, establishing place and programme identity; framing, angles, movement, cuts, fades and dissolves. WD (10 min): Model one analysis or worked response. Identify a specific feature, explain its meaning and link it to audience or purpose. YD (15 min): Students annotate a title sequence using image, technique and meaning; storyboard four opening shots with technical notes. Require evidence and explanations, then check responses with a partner. C (5 min): Students explain how two technical choices introduce a programme. Use responses to identify misconceptions.	Support: Provide key vocabulary, a labelled example and a response frame. Break the task into steps and check understanding before independent work. Extension: Compare an alternative example or interpretation and justify how context changes the audience response.

MATERIALS NEEDED FOR THE WEEK

- GCSE Media Studies for AQA (Heinemann, 2004), printed pages 34-39; matching weekly reference PDF.
- Teacher computer, display screen and speakers where audio is used
- Age-appropriate teacher-selected extracts or teacher-prepared fictional media texts
- Prepared analysis worksheet, evidence grid or production brief
- Paper, pencils, storyboard or design templates, and whiteboard markers
- Classroom computers and save folders; camera or approved image bank when required
- Lesson success criteria and teacher observation checklist; check school-event arrangements and reschedule any displaced task

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
