LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to describe the ICT course expectations and demonstrate safe, responsible classroom routines. They will also learn to identify digital devices and compare the uses of mainframe, desktop and laptop computers. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Teacher questioning, class discussion, the completed textbook activities and the final checks in both lessons. Teacher observation, questioning and the completed comparison task. Check that students can follow classroom routines, explain one equipment-care rule and identify suitable uses for mainframe, desktop and laptop computers.

LESSON SLOTS - MONDAY & WEDNESDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	24 August 2026	By the end of this lesson, students will be able to describe the ICT course expectations and demonstrate safe, responsible classroom routines.	**H:** Ask students what they hope to learn in ICT and where they use technology. **ID:** Introduce the course overview, learning activities, assessment routines and classroom expectations. **WD:** Model entering the computer room, handling equipment, signing in using school procedures, saving work and asking for help. **YD:** Students practise the routines, record a learning goal and explain agreed rules for equipment care and respectful participation. **C:** Check that each student can explain one classroom expectation and demonstrate a routine.	**Support:** Provide labelled diagrams, vocabulary, a structured response frame and a worked example. Apply agreed access arrangements during independent assessment without supplying answers. **Extension:** Justify an alternative solution, explain a limitation or apply the same concept to a new scenario using evidence.

2	26 August 2026	By the end of this lesson, students will be able to identify digital devices and compare the uses of mainframe, desktop and laptop computers.	**H:** Display examples of mainframe, desktop and laptop computers and ask where each might be used. **ID:** Use printed textbook pages 4–6 to introduce digital devices and the characteristics and uses of these computer types. **WD:** Compare the devices using purpose, portability and typical users, modelling a choice for a supplied scenario. **YD:** Students complete a comparison table and recommend a suitable computer for fictional users, giving a reason linked to the task. **C:** Ask students to identify the three computer types and justify one device choice.	**Support:** Provide labelled diagrams, vocabulary, a structured response frame and a worked example. Apply agreed access arrangements during independent assessment without supplying answers. **Extension:** Justify an alternative solution, explain a limitation or apply the same concept to a new scenario using evidence.

MATERIALS NEEDED FOR THE WEEK

- Pearson Edexcel International GCSE (9-1) ICT Student Book, printed pages 4-6
- Teacher computer and display

- School-approved applications, class save folder and fictional scenarios
- Relevant textbook diagrams, activities and chapter questions
- Student notebooks and a teacher assessment checklist

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
