LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to explain and apply course introduction and digital devices, using accurate textbook terminology and a justified example. They will also learn to explain and apply mainframe, desktop and laptop computers, using accurate textbook terminology and a justified example. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Teacher questioning, class discussion, the completed textbook activities and the final checks in both lessons. Check accurate terminology, explanations and application through the relevant book activities and questions. Record misconceptions and use the next feedback or consolidation session for corrections. Assess only content already taught.

LESSON SLOTS - MONDAY & WEDNESDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	24 August 2026	By the end of this lesson, students will be able to explain and apply course introduction and digital devices, using accurate textbook terminology and a justified example.	**H:** Use a short scenario, image or retrieval question to introduce course introduction and digital devices. **ID:** Teach course introduction and digital devices from printed pages 4-6; include the relevant definitions, diagrams and examples. **WD:** Work through a textbook example or comparison for course introduction and digital devices; explain each decision and check understanding. **YD:** Complete the relevant textbook activities and questions for course introduction and digital devices. Use a practical demonstration or scenario where appropriate; finish remaining practice as homework. **C:** Explain one key idea about course introduction	**Support:** Provide labelled diagrams, vocabulary, a structured response frame and a worked example. Apply agreed access arrangements during independent assessment without supplying answers. **Extension:** Justify an alternative solution, explain a limitation or apply the same concept to a new scenario using evidence.

			and digital devices and justify an answer; record misconceptions for the next lesson.	
2	26 August 2026	By the end of this lesson, students will be able to explain and apply mainframe, desktop and laptop computers, using accurate textbook terminology and a justified example.	**H:** Use a short scenario, image or retrieval question to introduce mainframe, desktop and laptop computers. **ID:** Teach mainframe, desktop and laptop computers from printed pages 4-6; include the relevant definitions, diagrams and examples. **WD:** Work through a textbook example or comparison for mainframe, desktop and laptop computers; explain each decision and check understanding. **YD:** Complete the relevant textbook activities and questions for mainframe, desktop and laptop computers. Use a practical demonstration or scenario where appropriate; finish remaining practice as homework. **C:** Explain one key idea about mainframe, desktop and laptop computers and justify an answer; record misconceptions for the next lesson.	**Support:** Provide labelled diagrams, vocabulary, a structured response frame and a worked example. Apply agreed access arrangements during independent assessment without supplying answers. **Extension:** Justify an alternative solution, explain a limitation or apply the same concept to a new scenario using evidence.

MATERIALS NEEDED FOR THE WEEK

- Pearson Edexcel International GCSE (9-1) ICT Student Book, printed pages 4-6
- Teacher computer and display
- School-approved applications, class save folder and fictional scenarios
- Relevant textbook diagrams, activities and chapter questions
- Student notebooks and a teacher assessment checklist

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
