Week:	12 (Term 1)	**Year:**	8
Link:		**Cover:**	

LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to create an e-learning slide with accurate content, a suitable image and source credits. They will also learn to add a test question with linked feedback and verify each answer path in slideshow mode. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Check the learning point, relevant content, image permission and credit, readable design and saved contribution. Check alignment, one correct option, helpful feedback and a test record showing that every link works. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND TUESDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	9 November 2026	By the end of this lesson, students will be able to create an e-learning slide with accurate content, a suitable image and source credits.	**H:** Compare a crowded slide with one focused on a single learning point. **ID:** Review checking facts, permission for reused images, readable layout and consistent group styling. **WD:** Use prepared sources to write a short explanation in original words, add a permitted image with credit and save the slide. **YD:** Pupils create their assigned lesson slide, peer-check its accuracy and readability and integrate it into the group draft. **C:** Check the learning point, relevant content, image permission and credit, readable design and saved contribution.	**Support:** Provide a small approved source pack, a slide starter and a link-testing checklist. Break the task into content, layout, question and feedback steps. **Extension:** Ask pupils to improve an explanation, accessibility feature or feedback message, then retest it against the learning goal.
2	10 November 2026	By the end of this lesson, students will be able to add a test question with	**H:** Show a question whose correct answer is not taught by its lesson.	**Support:** Provide a small approved source pack, a slide starter and a link-testing

		linked feedback and verify each answer path in slideshow mode.	**ID:** Explain a question aligned to the learning goal, plausible choices and feedback that explains the answer; use one correct answer for this task. **WD:** Create answer buttons, link them to correct or try-again feedback and add a return link; test in slideshow mode. **YD:** Pupils add one question to their lesson, connect every answer to suitable feedback and test all answer and return paths. **C:** Check alignment, one correct option, helpful feedback and a test record showing that every link works.	checklist. Break the task into content, layout, question and feedback steps. **Extension:** Ask pupils to improve an explanation, accessibility feature or feedback message, then retest it against the learning goal.

MATERIALS NEEDED FOR THE WEEK

- Oxford International Lower Secondary Computing Student Book 8 printed pages 50-57
- Teacher computer and display
- Classroom computers or laptops and the class save folder
- Teacher-approved research sources, a presentation starter and a link-testing checklist
- Whiteboard and markers
- Approved image pack with permission details and source-credit records
- Saved draft files, individual contribution records and the lesson success checklist

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
