LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to complete and test an e-learning lesson with a working question and feedback. They will also learn to demonstrate the taught learning-technology ideas and explain a tested e-learning design. Through teacher demonstrations, discussion and practical activities, students will practise these skills and explain their ideas.

End-of-Week Assessment/Check: How will you know they got it?

Use teacher observation, pupil explanations and the completed practical or paper activity. Assess the brief, teaching content, source credits and completed navigation tests in slideshow mode. Record secure outcomes and targets for mock assessment, including accurate explanations, source use and working navigation. Note pupils who need further guided practice.

LESSON SLOTS - MONDAY AND TUESDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	16 November 2026	By the end of this lesson, students will be able to complete and test an e-learning lesson with a working question and feedback.	**H:** Ask what evidence shows a learner has understood a mini-lesson. **ID:** Review the brief: a clear learning point, accurate media, source credits, an aligned question and usable navigation. **WD:** Test an example from contents to lesson, question, feedback and return; correct a broken link and retest it. **YD:** Pupils complete their contribution and ask a partner to follow every path, then record and fix one improvement. **C:** Assess the brief, teaching content, source credits and completed navigation tests in slideshow mode.	**Support:** Provide a small approved source pack, a slide starter and a link-testing checklist. Break the task into content, layout, question and feedback steps. **Extension:** Ask pupils to improve an explanation, accessibility feature or feedback message, then retest it against the learning goal.
2	17 November 2026	By the end of this lesson, students will be able to demonstrate the taught learning-technology	**H:** Revisit tool choice, research, models and learning checks through short prompts.	**Support:** Provide a small approved source pack, a slide starter and a link-testing checklist. Break the task into

		ideas and explain a tested e-learning design.	**ID:** Explain the check: compare learning uses, trace a discovery example and demonstrate an individual slide and question. **WD:** Model how to show evidence from a separate example without editing pupils' checked drafts. **YD:** Pupils complete a short knowledge check, demonstrate their own slide and feedback paths and justify one improvement. **C:** Record secure outcomes and targets for mock assessment, including accurate explanations, source use and working navigation.	content, layout, question and feedback steps. **Extension:** Ask pupils to improve an explanation, accessibility feature or feedback message, then retest it against the learning goal.

MATERIALS NEEDED FOR THE WEEK

- Oxford International Lower Secondary Computing Student Book 8 printed pages 32-59
- Teacher computer and display
- Classroom computers or laptops and the class save folder
- Teacher-approved research sources, a presentation starter and a link-testing checklist
- Whiteboard and markers
- Approved image pack with permission details and source-credit records
- Saved draft files, individual contribution records and the lesson success checklist

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
