LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to compare methods of generating energy. They will also learn to explain energy storage and justify an energy choice. Product examples, teacher demonstrations and guided tasks will help them apply the ideas and explain their decisions.

End-of-Week Assessment/Check: How will you know they got it?

Explain one advantage and one disadvantage of a selected source. Link the choice to the product requirements and a practical limitation. Review the completed work and final responses to identify misconceptions.

LESSON SLOTS - TUESDAY & WEDNESDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	08 September 2026	By the end of this lesson, students will be able to compare methods of generating energy.	**H:** Use a short product example or question to introduce the topic and recall relevant knowledge. **ID:** Explain the generation methods in the book and distinguish renewable and finite sources. Refer to printed book pages 14-15. **WD:** Complete a second example together. Ask students to explain their decisions and correct misconceptions. **YD:** Create a comparison of energy sources for a defined situation. Record the reasoning using appropriate vocabulary. **C:** Explain one advantage and one disadvantage of a selected source.	**Support:** Provide labelled examples, a vocabulary guide and a structured comparison or diagram. Use prompts before independent work. **Extension:** Apply the concept to an unfamiliar product, justify an alternative and explain a trade-off.

2	09 Septemb er 2026	By the end of this lesson, students will be able to explain energy storage and justify an energy choice.	**H:** Use a short product example or question to introduce the topic and recall relevant knowledge. **ID:** Model how batteries and other storage approaches meet different needs. Refer to printed book pages 14-15. **WD:** Complete a second example together. Ask students to explain their decisions and correct misconceptions. **YD:** Select an energy source and storage method for a product and justify suitability. Record the reasoning using appropriate vocabulary. **C:** Link the choice to the product requirements and a practical limitation.	**Support:** Provide labelled examples, a vocabulary guide and a structured comparison or diagram. Use prompts before independent work. **Extension:** Apply the concept to an unfamiliar product, justify an alternative and explain a trade-off.

MATERIALS NEEDED FOR THE WEEK

- Pearson Edexcel GCSE Design and Technology Revision Notes, printed pages 14-15
- Teacher computer and classroom display
- Relevant product images, material samples or teacher demonstration models
- Student notebooks, drawing equipment and task sheets

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
