LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to identify types of movement and explain mechanical force transfer. They will also learn to select and explain mechanisms for a purpose. Product examples, teacher demonstrations and guided tasks will help them apply the ideas and explain their decisions.

End-of-Week Assessment/Check: How will you know they got it?

Explain how a mechanism changes movement or force. Justify the mechanism and explain its input and output. Review the completed work and final responses to identify misconceptions.

LESSON SLOTS - TUESDAY & WEDNESDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	22 September 2026	By the end of this lesson, students will be able to identify types of movement and explain mechanical force transfer.	**H:** Use a short product example or question to introduce the topic and recall relevant knowledge. **ID:** Model the movement and mechanical principles shown in the textbook. Refer to printed book pages 19-22. **WD:** Complete a second example together. Ask students to explain their decisions and correct misconceptions. **YD:** Label movement types and trace the input and output of simple mechanisms. Record the reasoning using appropriate vocabulary. **C:** Explain how a mechanism changes movement or force.	**Support:** Provide labelled examples, a vocabulary guide and a structured comparison or diagram. Use prompts before independent work. **Extension:** Apply the concept to an unfamiliar product, justify an alternative and explain a trade-off.

2	23 September 2026	By the end of this lesson, students will be able to select and explain mechanisms for a purpose.	**H:** Use a short product example or question to introduce the topic and recall relevant knowledge. **ID:** Work through the book mechanisms using diagrams and a simple model. Refer to printed book pages 19-22. **WD:** Complete a second example together. Ask students to explain their decisions and correct misconceptions. **YD:** Choose a mechanism for a design problem and draw its operation. Record the reasoning using appropriate vocabulary. **C:** Justify the mechanism and explain its input and output.	**Support:** Provide labelled examples, a vocabulary guide and a structured comparison or diagram. Use prompts before independent work. **Extension:** Apply the concept to an unfamiliar product, justify an alternative and explain a trade-off.

MATERIALS NEEDED FOR THE WEEK

- Pearson Edexcel GCSE Design and Technology Revision Notes, printed pages 19-22
- Teacher computer and classroom display
- Relevant product images, material samples or teacher demonstration models
- Student notebooks, drawing equipment and task sheets

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
