LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to distinguish thermoforming and thermosetting polymers. They will also learn to explain fibre types and textile construction. Product examples, teacher demonstrations and guided tasks will help them apply the ideas and explain their decisions.

End-of-Week Assessment/Check: How will you know they got it?

Explain the difference between the two polymer families. Link fibre choice and fabric construction to the required performance. Review the completed work and final responses to identify misconceptions.

LESSON SLOTS - TUESDAY & WEDNESDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	03 November 2026	By the end of this lesson, students will be able to distinguish thermoforming and thermosetting polymers.	**H:** Use a short product example or question to introduce the topic and recall relevant knowledge. **ID:** Model how the polymer families respond to heat using textbook examples. Refer to printed book pages 30-33. **WD:** Complete a second example together. Ask students to explain their decisions and correct misconceptions. **YD:** Classify polymers and justify a material choice for a stated product. Record the reasoning using appropriate vocabulary. **C:** Explain the difference between the two polymer families.	**Support:** Provide labelled examples, a vocabulary guide and a structured comparison or diagram. Use prompts before independent work. **Extension:** Apply the concept to an unfamiliar product, justify an alternative and explain a trade-off.

2	04 Novembe r 2026	By the end of this lesson, students will be able to explain fibre types and textile construction.	**H:** Use a short product example or question to introduce the topic and recall relevant knowledge. **ID:** Compare natural, synthetic, blended and mixed fibres and woven, knitted and non-woven textiles. Refer to printed book pages 30-33. **WD:** Complete a second example together. Ask students to explain their decisions and correct misconceptions. **YD:** Classify samples or images and select a textile for a stated use. Record the reasoning using appropriate vocabulary. **C:** Link fibre choice and fabric construction to the required performance.	**Support:** Provide labelled examples, a vocabulary guide and a structured comparison or diagram. Use prompts before independent work. **Extension:** Apply the concept to an unfamiliar product, justify an alternative and explain a trade-off.

MATERIALS NEEDED FOR THE WEEK

- Pearson Edexcel GCSE Design and Technology Revision Notes, printed pages 30-33
- Teacher computer and classroom display
- Relevant product images, material samples or teacher demonstration models
- Student notebooks, drawing equipment and task sheets

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
