LESSON OVERVIEW

What should students know/do by the end of this week's lessons?

Students will learn to use a design context to inform material and product choices. They will also learn to evaluate environmental, social and economic challenges in design. Product examples, teacher demonstrations and guided tasks will help them apply the ideas and explain their decisions.

End-of-Week Assessment/Check: How will you know they got it?

Connect a design decision to evidence from the context. Explain how the improvement addresses a challenge and identify a limitation. Review the completed work and final responses to identify misconceptions.

LESSON SLOTS - TUESDAY & WEDNESDAY

Lesson	Date	Learning Objective	The Lesson Flow	Differentiation
1	17 November 2026	By the end of this lesson, students will be able to use a design context to inform material and product choices.	**H:** Use a short product example or question to introduce the topic and recall relevant knowledge. **ID:** Model identifying a need, constraints and suitable material properties. Refer to printed book pages 37-40. **WD:** Complete a second example together. Ask students to explain their decisions and correct misconceptions. **YD:** Analyse a design context and justify decisions against its requirements. Record the reasoning using appropriate vocabulary. **C:** Connect a design decision to evidence from the context.	**Support:** Provide labelled examples, a vocabulary guide and a structured comparison or diagram. Use prompts before independent work. **Extension:** Apply the concept to an unfamiliar product, justify an alternative and explain a trade-off.

2	18 Novembe r 2026	By the end of this lesson, students will be able to evaluate environmental, social and economic challenges in design.	**H:** Use a short product example or question to introduce the topic and recall relevant knowledge. **ID:** Model a product evaluation including sustainability, cultural needs and economic effects. Refer to printed book pages 37-40. **WD:** Complete a second example together. Ask students to explain their decisions and correct misconceptions. **YD:** Evaluate a product and propose an improvement with a justified trade-off. Record the reasoning using appropriate vocabulary. **C:** Explain how the improvement addresses a challenge and identify a limitation.	**Support:** Provide labelled examples, a vocabulary guide and a structured comparison or diagram. Use prompts before independent work. **Extension:** Apply the concept to an unfamiliar product, justify an alternative and explain a trade-off.

MATERIALS NEEDED FOR THE WEEK

- Pearson Edexcel GCSE Design and Technology Revision Notes, printed pages 37-40
- Teacher computer and classroom display
- Relevant product images, material samples or teacher demonstration models
- Student notebooks, drawing equipment and task sheets

END-OF-WEEK REFLECTION

- What worked well?

- What flopped or confused students?

- What needs to be re-taught or adjusted next week?
